

# 2017

## COLORADO LEGISLATIVE CONSERVATION SCORECARD

You care about  
Colorado's  
environmental  
legacy.

### DO YOUR LEGISLATORS?

The Colorado Legislative Conservation Scorecard highlights the priorities of the conservation community for the 2017 legislative session. Here, you will find factual, nonpartisan information on bills related to our environment and how each member of the state legislature voted on issues that affect Colorado's air, land, water, and people.

Find out how your elected officials voted, and see how well their votes align with your conservation values. Then call or write to your legislators and let them know you're paying attention to their environmental scores!

Conservation  
Colorado turns  
conservation values  
into Colorado  
priorities.

Conservation Colorado

The future is worth the fight

## 2017 OVERVIEW

**The beginning of the Trump administration has been characterized by attacks on our clean air, water, public lands, and communities. When the president and his administration insist on rolling back important environmental protections, we must make progress where we can.**

This means that making change on the state level is more important than ever. States like Colorado must take the lead to protect our values, environment, and way of life.

Fortunately, thanks to your help sending emails, making calls, and spreading the word on important bills, we were able to make a big impact in the Colorado state legislature this year. From saving energy to keeping drinking water safe for our children, we had several significant wins that will be felt across the state.

But the fight continues. We had a number of other chances to make important changes for our communities, but unfortunately we were met with ideological resistance from a handful of legislators. Several key bills were stalled or killed, from investments in safer and more environmentally-friendly transportation to commonsense measures to better protect communities facing the impacts of oil and gas drilling.

That's why we are counting on you to help keep up the fight. Whether it's testifying at the Capitol or sending a message to your legislator, we need everyone's help to protect our environment and way of life. And of course, we are already looking ahead to

electing a pro-conservation majority in the state Senate in 2018. Elections matter for protecting Colorado's environment, and we'll need you on our team.

Together, we can continue making meaningful changes to protect our air, land, water, and people, and Colorado can be a leader among states.

## Spotlight: THE NEW “KILL” COMMITTEE

Within our state legislature, there are rules in place to make sure every bill is heard in a committee and then voted on. But sometimes, these committees can operate as “kill” committees, where bills die on party-line votes for purely ideological reasons.

This year, several pieces of legislation with broad, bipartisan support met their deaths in the Senate Finance Committee at the hands of three Republican Senators: Tim Neville, Owen Hill, and Jack Tate. Two of these bills were:

**House Bill 1242:** This measure would have allowed Coloradans to vote on whether to generate new, sustainable funding for our transportation system by raising the state sales tax by one half of one percent to fund roads, bridges, safer routes to schools, and public transportation. Sponsored by the top ranking members of each chamber (Republican Senate President Kevin Grantham and the Democratic Speaker of the House Crisanta Duran), as well as the heads of the transportation committees in both chambers, the bill was crafted during months of stakeholder collaboration. It garnered broad support from across the state, and passed the House with bipartisan support.

Despite this backing, the Republican-led Senate Finance Committee killed the bill in committee, denying the full Senate a vote and voters the opportunity to

decide whether to approve the measure. As Senator Grantham, the Republican sponsor of the bill, said, “We only get so many bites at the apple...but if the number of bites we get is exactly zero, then zero is the result we will get.”

**House Bill 1321:** This bill would have provided a much-needed fix for funding our state parks and wildlife areas. Colorado Parks and Wildlife fees for hunting and fishing haven’t kept pace with rising costs and inflation. At the hearing for this bill, 35 people and institutions testified in favor of the bill and only one person testified in opposition. Regardless, the same three Senators on the Senate Finance Committee decided that our parks were not worth investing in.

It is distressing to see three members of the legislature stand in the way of progress for the whole state and deny voters a voice in matters that affect them. It is likely that this level of obstructionism will impact future elections.

# Clean Energy

Colorado has a long history of leading on clean energy and energy efficiency. Renewable energy supports our economy, protects public health, and puts us on a path towards a resilient future.

## House Bill 1227

**1**  ELECTRIC DEMAND-SIDE MANAGEMENT PROGRAM EXTENSION

**Pro-Environment Vote: YES**

**Bill Sponsors: Representatives Faith Winter and Polly Lawrence, Senators Kevin Priola and Stephen Fenberg**

**House Vote: Passed 42-22**

**Senate Vote: Passed 21-14**

**Signed by the Governor: May 18, 2017**

**Description:** Energy efficiency programs have been successful in our state, saving money for families and businesses while reducing air pollution. A bill passed in 2007 created the Energy Efficiency Resource Standard, which requires energy savings goals for utilities and provides incentives for implementing energy efficiency programs. Since it began, the program has created over 40,000 jobs, avoided 1.85 million metric tons of carbon pollution, and saved Colorado consumers and businesses over a billion dollars. This program was set to expire in 2018, but this bill extends it through 2028.

## House Bill 1116

**2**  CONTINUE LOW-INCOME HOUSEHOLD ENERGY ASSISTANCE

**Pro-Environment Vote: YES**

**Bill Sponsors: Representatives Millie Hamner and Tony Exum, Senator Beth Martinez Humenik**

**House Vote: Passed 48-17**

**Senate Vote: Passed 24-11**

**Signed by the Governor: June 6, 2017**

**Description:** The Low-income Energy Assistance Program (LEAP) helps working families by providing support for weatherization and energy efficiency programs. Since LEAP began in 2006, it has saved Colorado families over \$140 million in energy costs. The source of the program’s funding was set to expire in 2018, but this bill extends the “conditional severance tax operational fund” through 2023 to continue aiding low-income families.

# Clean Energy

## Senate Bill 301

3

ENERGY-RELATED  
STATUTES

**Pro-Environment Vote: YES**

**Bill Sponsors: Senators Ray Scott and Vicki Marble, Representatives KC Becker and Lori Saine**

**House Vote: Passed 38-27**

**Senate Vote: Failed 17-18**

**Description:** The Colorado Energy Office plays a valuable role in our state, including expanding the market for electric vehicles, helping working families access weatherization programs, and supporting energy efficiency for farmers and ranchers. A majority of its funding was set to expire this year, but instead of authorizing continued funding, Senate Republicans took the opportunity to hold the office hostage in an effort to provide a windfall for natural gas. In the end, efforts to preserve funding for this important office failed because of some Senators intransigence. We are scoring the House-amended final version of the bill that would have reauthorized the office, without the natural gas drilling components that were unrelated to it.

## Senate Bill 105

4

CONSUMER RIGHT TO  
KNOW ELECTRIC UTILITY  
CHARGES

**Pro-Environment Vote: YES**

**Bill Sponsors: Senator Leroy Garcia, Representatives Daneya Esgar and KC Becker**

**House Vote: Passed 38-27**

**Senate Vote: Passed 22-12**

**Signed by the Governor: May 22, 2017**

**Description:** This bill requires two utilities—Xcel Energy and Black Hills Energy—to provide their customers with more transparent utility bills. Customers will now receive bills that have easy-to-understand charts of their energy usage over twelve months and line-items of monthly charges that clarify rates and usage. This provides customers the information they need to reduce their energy use and make informed decisions.

## Clean Air and Climate Change

In a time when our clean air and climate protections are being threatened from the national level, it's up to states to take the lead. This year, Colorado legislators had several opportunities to protect our air quality and climate.

### Senate Bill 278

5

PROHIBIT NUISANCE EXHIBITION MOTOR VEHICLE EXHAUST

**Pro-Environment Vote: YES**

**Bill Sponsors: Senator Don Coram, Representative Joann Ginal**

**House Vote: Passed 40-25**

**Senate Vote: Passed 22-12**

**Signed by the Governor: June 5, 2017**

**Description:** When owners tamper with the exhaust system of their vehicles to blow black smoke from their tailpipes, it is called "rolling coal." The sole purpose of this activity is to harass pedestrians, cyclists, and other drivers, and it is a public health and safety hazard. This bill makes Colorado the second state in the nation to ban rolling coal, classifying it as a Class A traffic infraction punishable by a \$100 fine.

### Senate Bill 254

6

AMENDMENT J055 - STATE BUDGET BILL

**Pro-Environment Vote: YES**

**Sponsors: Senators Stephen Fenberg, Irene Aguilar, Andy Kerr, Matt Jones, and Kerry Donovan**

**Senate Vote: Failed 16-19**

**Description:** This amendment to the state budget bill ("the Long Bill") would have provided mobile air monitoring units to increase the ability of our state oil and gas agency to monitor chemicals emitted from oil and gas sites. This information is important to help establish safe levels of emissions and ensure that companies are complying with all measures to maintain air quality around well sites.

### House Bill 1366

7

MEASURABLE GOALS DEADLINES COLORADO CLIMATE ACTION PLAN

**Description:** In 2015, Colorado Governor John Hickenlooper unveiled a state climate action plan, which was an exciting turning point for how his administration talked about climate change. However, this plan lacked detailed goals, actions, or deadlines for reducing carbon pollution. This bill was the second attempt in two years to add specific, measurable goals and deadlines to the climate action plan in order to ensure that the plan has a real impact.

**Pro-Environment Vote: YES**

**Bill Sponsors: Representatives Faith Winter and Jeni Arndt, Senator John Kefalas**

**House Vote: Passed 37-28**

**Senate: Failed in State Affairs Committee**

# Transportation

As Colorado's population booms, we must look ahead to ensure smart growth for our communities. This means building systems that move people, not just cars, and providing transportation options that meet all of our communities' needs, including those of children, the elderly, and working families.

## House Bill 1242

8

NEW TRANSPORTATION  
INFRASTRUCTURE  
FUNDING REVENUE

**Pro-Environment Vote: YES**

**Bill Sponsors: Representatives Crisanta Duran and Diane Mitsch Bush, Senators Kevin Grantham and Randy Baumgardner**

**House Vote: Passed 41-24**

**Senate: Failed in Finance Committee**

**Description:** One of the priorities of both the state Senate and House this year was to secure long-term, sustainable funding for Colorado's transportation sector. Coloradans want a transportation system that is safe, modern, and provides options. In addition to funding roads and bridges, Colorado needs significant investments in public transportation, safer walkways, and biking opportunities. This bill would have allowed Coloradans to vote on a modest increase to the statewide sales tax to add \$3.5 billion into the state's transportation sector in a measure that included significant funding for multimodal options.

## House Bill 1232

9

PUBLIC UTILITIES  
ALTERNATIVE FUEL  
MOTOR VEHICLES

**Pro-Environment Vote: YES**

**Bill Sponsors: Representative Jessie Danielson, Senator Kevin Priola**

**House Vote: Passed 36-28**

**Senate: Failed in State Affairs Committee**

**Description:** Colorado is currently the best state in the nation to buy an electric vehicle due to our excellent tax incentives, and this bill was an effort to make Colorado one of the best states in which to drive one. It would have removed barriers to allow utilities to build infrastructure for alternative fuels vehicles, such as electric vehicle charging stations.

# Oil and Gas

Oil and gas drilling in Colorado is pushing further into communities. Several commonsense measures were introduced this year to protect human health, safety, and the environment from the dangers of living near oil and gas activity.

## House Bill 1256

10

OIL AND GAS FACILITIES  
DISTANCE FROM SCHOOL  
PROPERTY

**Pro-Environment Vote: YES**

**Bill Sponsors: Representative Mike Foote, Senators Matt Jones and Irene Aguilar**

**House Vote: Passed 37-28**

**Senate: Failed in Agriculture, Natural Resources, and Energy Committee**

**Description:** Oil and gas operations are currently required to be 1,000 feet away from school buildings, but not school property lines that encompass playgrounds and sports fields. This bill would have clarified that wells must be 1,000 feet away from a school's property boundary, closing a loophole that puts children at risk.

## House Bill 1336

11

ADDITIONAL  
PROTECTIONS FORCED  
POOLING ORDER

**Pro-Environment Vote: YES**

**Bill Sponsors: Representatives Mike Foote and Dave Young, Senators Matt Jones and Irene Aguilar**

**House Vote: Passed 36-29**

**Senate: Failed in State Affairs Committee**

**Description:** "Forced pooling" allows

oil and gas companies to extract minerals without the mineral owner's permission. Under current law, if one neighbor in a subdivision signs a lease for energy development, the entire neighborhood's mineral rights could be developed by an oil and gas company. This bill sought to increase how much notice oil and gas companies have to give mineral rights owners before force pooling, as well as create better statewide tracking of the number of people and acres subjected to forced pooling.

## Senate Bill 35

12

TAMPERING WITH OIL AND  
GAS EQUIPMENT

**Pro-Environment Vote: NO**

**Bill Sponsors: Senator Jerry Sonnenberg, Representative Jon Becker**

**House: Failed in State Affairs Committee**

**Senate Vote: Passed 19-16**

**Description:** It is currently a misdemeanor to knowingly tamper with or vandalize equipment used for oil and gas activity such as pipelines, fences, and well pads. In Colorado, these crimes rarely occur. Yet this bill would have created a new felony with punishments up to 18 months in prison and a \$100,000 fine for tampering with oil and gas equipment. Several proper legal channels to address these actions already exist, so this bill was unnecessary.

Photo credit: WildEarth Guardians

## Spotlight: AN INDUSTRY VERSUS THE PEOPLE

**Oil and gas development has been a controversial topic in Colorado for years, but this year the controversy took a more urgent turn.**

In April, two people in Firestone, Colorado were killed when their house exploded from natural gas leaking out of a flow line from a nearby oil well. Lawmakers tried to pass a bill to require oil and gas companies to release maps of their flow lines, but it failed in the state Senate due to pressure from the oil and gas industry.

This wasn't the only bill killed at the behest of the oil and gas industry this year. Safeguards to keep oil and gas away from school properties and to protect homeowners from being forced to allow development of their mineral rights were

also defeated. In addition, Republicans in the Senate refused to pass two practical budget amendments: adding oil and gas field inspectors and buying mobile air quality monitoring units.

Rather than passing productive bills to make oil and gas drilling safer, the oil and gas industry focused their time and lobbying might on "solving" a nonexistent problem: creating a new felony charge for tampering with oil and gas equipment. In other words, the industry used its lobbying power at the Capitol to protect itself, not Coloradans.

# Water

We work to protect our water quality and keep our rivers healthy and flowing. As Colorado’s population grows, the gap between our water supply and demand will only increase. Our state must take all necessary steps to conserve water in order to protect water users and reduce stress on our rivers. In addition, we are striving to ensure Colorado’s water is safe and clean.

## House Bill 1233

13

PROTECT WATER  
HISTORICAL  
CONSUMPTIVE USE  
ANALYSIS

**Pro-Environment Vote: YES**

**Bill Sponsors: Representative Jeni Arndt, Senator Larry Crowder**

**House Vote: Passed 41-20**

**Senate Vote: Passed 24-11**

**Signed by the Governor: May 3, 2017**

**Description:** This bill creates more opportunity for water right owners like farmers and irrigators to participate in water conservation programs. In Colorado, if you don’t use all of the water that you own each year, you could lose your legal right to it, which can dissuade people from conserving water. This bill expands a program to incentivize water conservation while protecting irrigators’ water rights. Now, if they participate in a state-approved water conservation plan and reduce their water use, the reduced usage will not be used against them.

## House Bill 1273

14

REAL ESTATE  
DEVELOPMENT  
DEMONSTRATE WATER  
CONSERVATION

**Pro-Environment Vote: YES**

**Bill Sponsors: Representatives Chris Hansen and Hugh McKean, Senators Matt Jones and Don Coram**

**House Vote: Passed 40-25**

**Senate: Failed in State Affairs Committee**

**Description:** This bipartisan bill aimed to ensure that future homes and communities are built in a smart way. It would have required new real estate developments to include water conservation and demand management measures to be included in planning in order to gain permitting approval from local governments. This would have prioritized water conservation as we continue to build and expand our communities.

# Water

## House Bill 1306

15

TEST LEAD IN PUBLIC  
SCHOOLS' DRINKING  
WATER

**Pro-Environment Vote: YES**

**Bill Sponsors: Representatives Barbara McLachlan and Tony Exum, Senators Kerry Donovan and Don Coram**

**House Vote: Passed 47-18**

**Senate Vote: Passed 29-6**

**Signed by the Governor: June 8, 2017**

**Description:** This bill provides funding to test for lead in schools' drinking water, thereby better protecting our children's

health. Lead can leach into drinking water from old pipes and fixtures, and in the Colorado school districts that have already tested for lead, more than 100 schools found water sources with elevated levels of it. There is no safe level of lead exposure, and it can be especially damaging to young children. Providing schools the funding to proactively test for lead is critical to safeguard our children's health and protect our drinking water.

# Public Lands

In Colorado, our public lands are an integral part of our economy and way of life. Coloradans have proven time and again that we revere our parks, open spaces, and wild places. Despite an ideological effort over the past several years to turn our public lands over to state and private interests, this idea has been dead on arrival in Colorado. We will keep fighting to protect all of our public lands.

## House Bill 1321

16

PARKS AND  
WILDLIFE FINANCIAL  
SUSTAINABILITY

**Pro-Environment Vote: YES**

**Bill Sponsors: Representatives Jeni Arndt and James Wilson, Senators Stephen Fenberg and Don Coram**

**House Vote: Passed 42-22**

**Senate: Failed in Finance Committee**

**Description:** Colorado Parks and Wildlife relies on revenue from user fees to cover expenses like repairing natural habitats, ensuring public safety, and maintaining recreation areas. However, the revenue from these fees has not kept pace with operational costs and inflation in recent years. As a result, the agency's budget has been reduced by \$40 million in the last eight years. This bill would have allowed the Parks and Wildlife Commission to address these financial issues by setting appropriate user fees. An adequately-funded and well-managed state wildlife agency can boost sustainable and diverse economic development, especially in rural areas. This is because hunting, fishing, and wildlife watching generate about \$6 billion in economic impact, according to Colorado Parks and Wildlife.

## Spotlight: PUBLIC LANDS PROUD

For decades, anti-government activists have fought the idea that public lands belong to all Americans. In recent years, this extreme view has trickled into the mainstream and has made its way into many state legislatures.

Over the past five years, eight bills were introduced in the Colorado legislature to seize our public lands and transfer them to the state or private interests. These bills are fundamentally bad policy and were overwhelmingly opposed by Coloradans all over the state. Any one of these misguided ideas would have triggered years of litigation, cost the state millions of dollars, stalled our tourism economy, and if successful, left our public lands unprotected from development. Every one of these bills was killed because Coloradans spoke out.

This year, not a single bill to seize our public lands was introduced, demonstrating just how unpopular this idea has become. In contrast, this May we celebrated the first-ever Colorado Public Lands Day with more than 130 events across the state and over 2,000 participants. With this new holiday, we were able to prove the widespread love for public lands that Coloradans share.
