

2018 Conservation Scorecard

You care about Colorado's environmental legacy.

DO YOUR LEGISLATORS?

The Conservation Scorecard provides an overview of the 2018 legislative session around the environment. Here, you will find factual, nonpartisan information on the priorities of the conservation community and a record of how each member of the state legislature voted on those priority bills that affect Colorado's air, land, water, and communities.

Find out how your elected officials voted, and see how well their votes align with your conservation

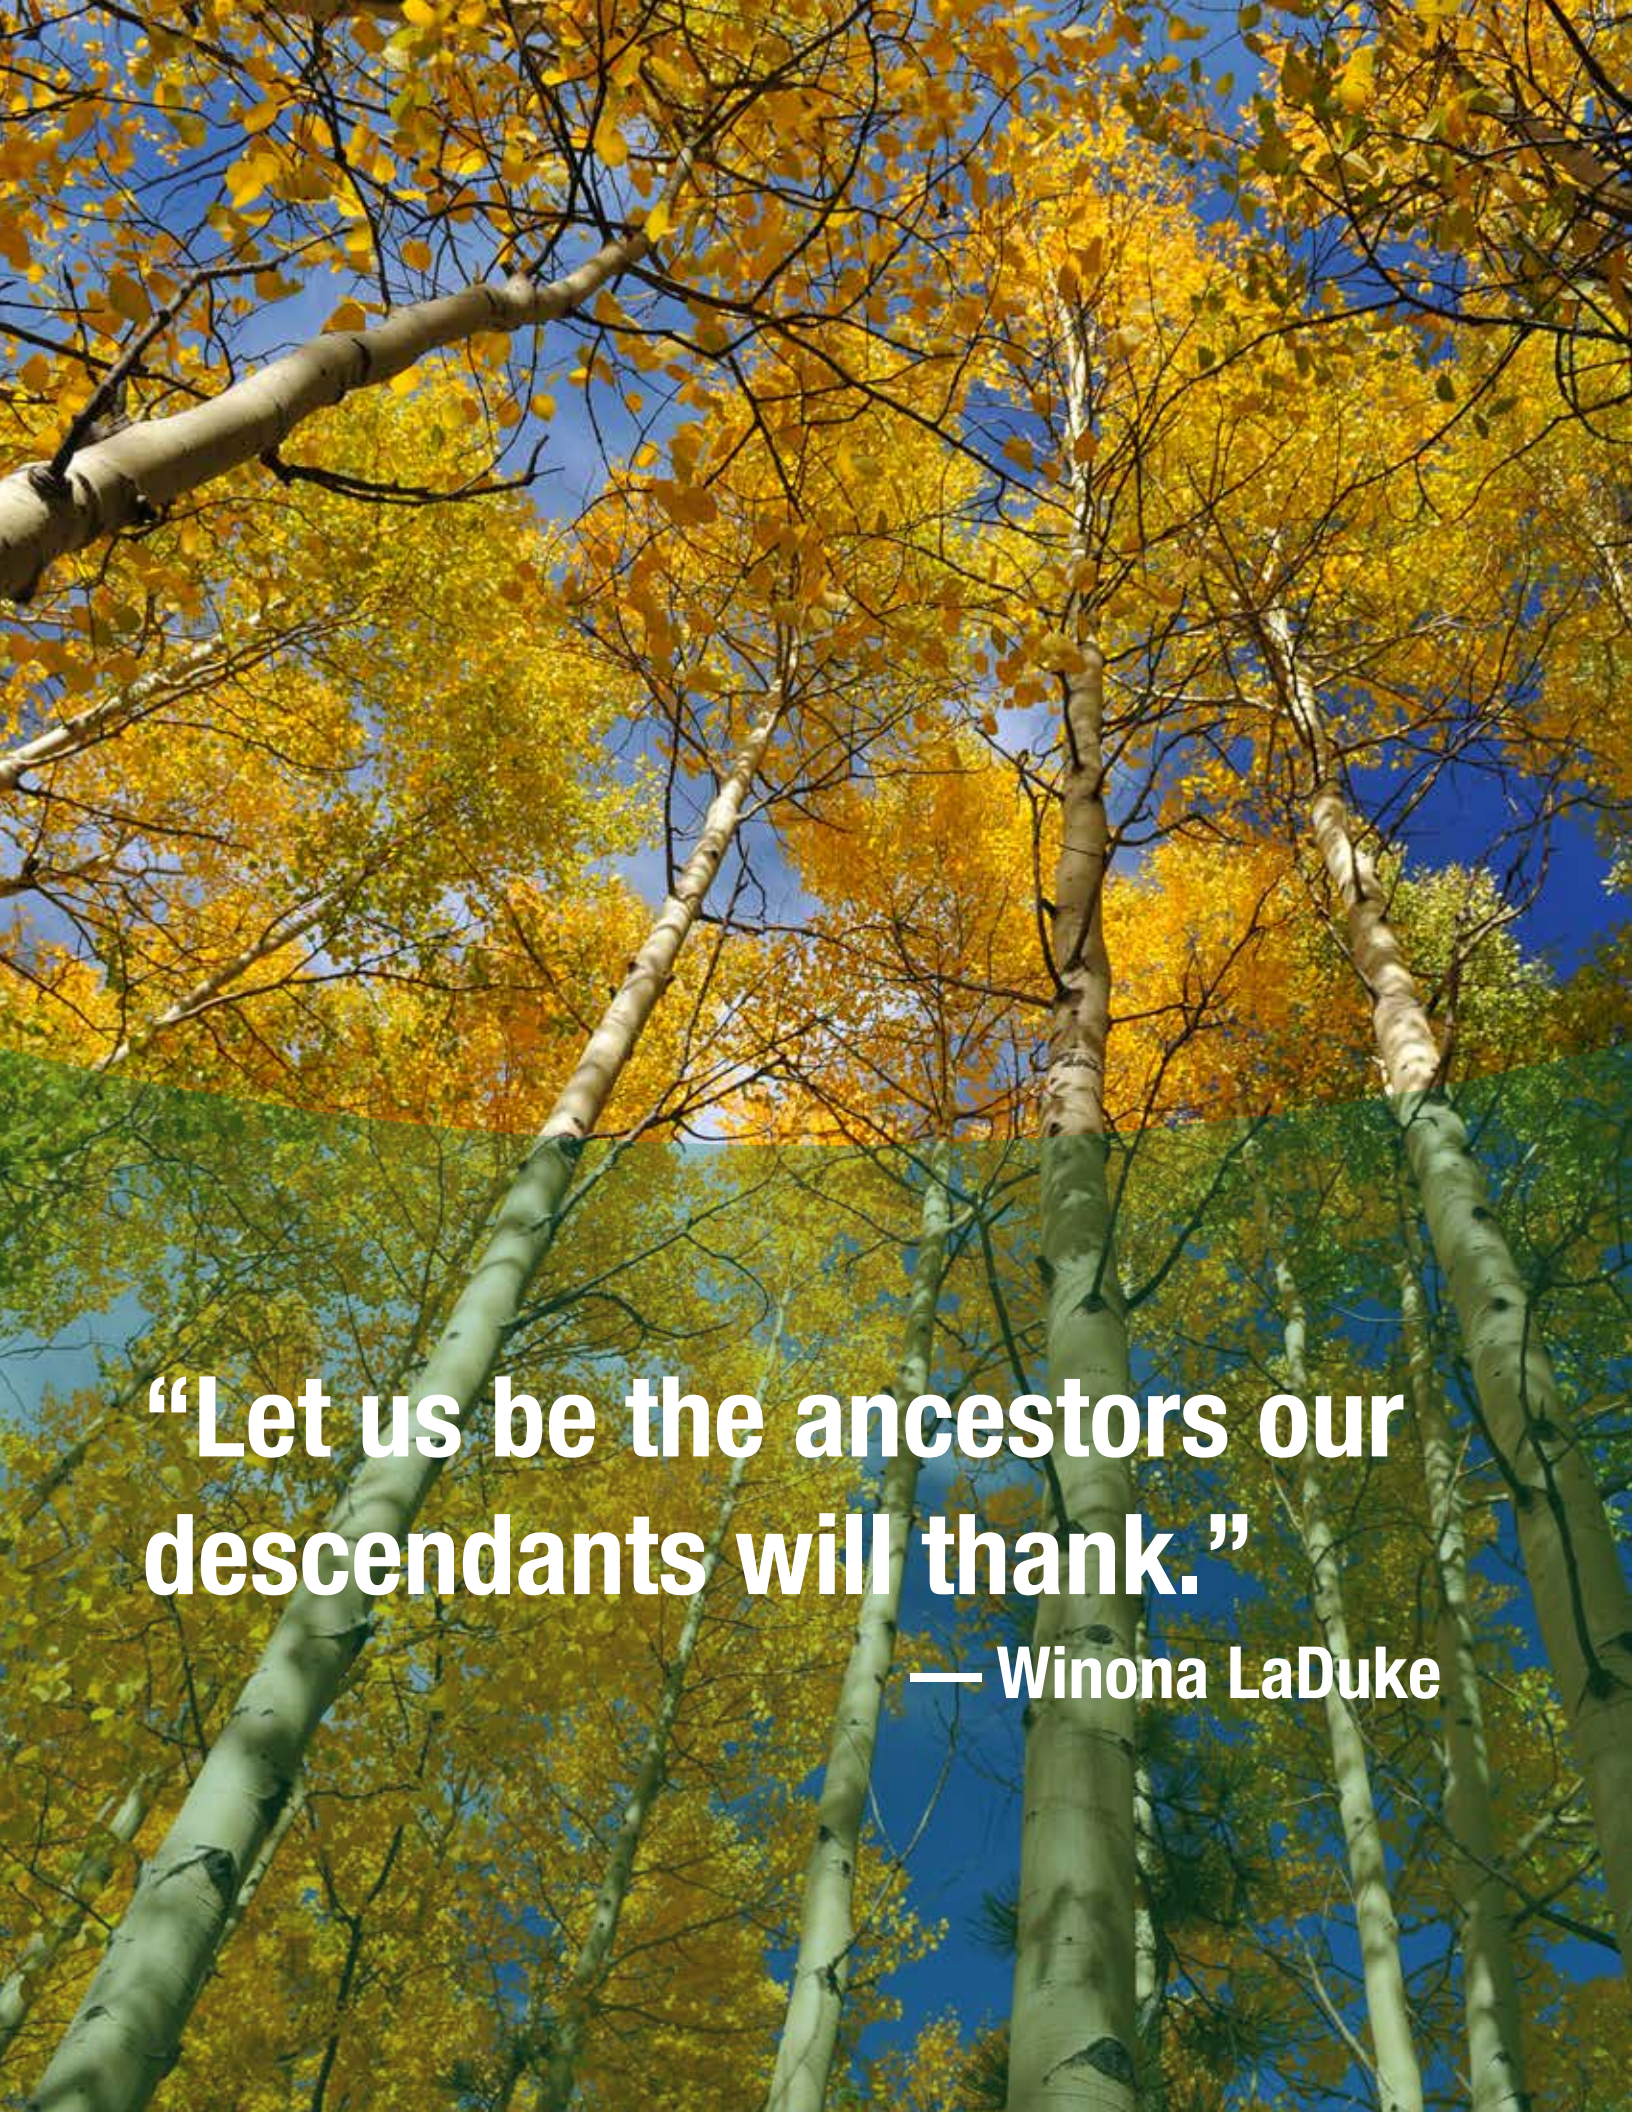

values. Then call or write to your legislators and let them know that you're paying attention to their environmental scores!

Conservation Colorado

The future is worth the fight

Conservation Colorado turns conservation values into Colorado priorities.

**“Let us be the ancestors our
descendants will thank.”**

— Winona LaDuke

OVERVIEW

You — our volunteers, members, and supporters — made our victories possible in the 2018 legislative session.

This massive effort from our community helped us achieve some big wins this year. We were able to make progress for Colorado by investing in our great outdoors, expanding the use of recycled water, and increasing energy storage at home and on the grid. But many common sense conservation measures were blocked, including bills that would have better protected children from the impacts of oil and gas development or reduced carbon pollution.

Meanwhile, this legislative session, we saw many of our core values threatened. Five male legislators faced sexual harassment allegations, sparking a review of workplace policies at the Capitol and resulting in the expulsion of a sitting Representative. The Colorado Civil Rights Commission was nearly defunded by lawmakers playing politics with the

rights of lesbian, gay, bisexual, and transgender people. And immigrants faced painful attacks by legislators pushing regressive policies that would harm families who love this country and are working hard to build their lives here.

Even as these emotional controversies colored the session, the conservation story remained the same for yet another year. Bold policies to protect our environment and way of life were shut down, reminding us once again of the need to elect pro-conservation leaders. With a pro-conservation Senate, House, and Governor, we can fight for our land, air, water, and communities.

As we approach the 2018 election, we need our supporters more than ever.

Together, we can win and ensure Colorado remains a leader in the West and across this country.

LANDS & WATER

Colorado's rushing rivers and public lands are central to our economy and our way of life. As our population grows, demand is increasing on our natural resources. This year we worked to increase water conservation, protect water quality, and help fund our great outdoors.

Bill Descriptions

1 HOUSE BILL 1069 | RECLAIMED WATER USE FOR TOILET FLUSHING

To ensure Colorado has enough water now and into the future without continuing to drain our rivers, we need to increase the use of "reclaimed" water. Reclaimed water, or recycled water, is the process of treating wastewater so it can be reused for other purposes. HB 1069 allows reclaimed water to be used for toilet flushing. Stretching our water supply by using recycled water protects our rivers and streams and decreases pressure to divert more water from the West Slope.

Bill Sponsors: Representatives Jeni Arndt and Dan Thurlow, Senator Don Coram

House Vote: Passed 47-14 | **Senate Vote:** Passed 32-3
Signed by the Governor: April 30, 2018

Pro-Environment Vote | YES

2 HOUSE BILL 1301 | PROTECT WATER QUALITY FROM ADVERSE MINING IMPACTS

In Colorado, more than 1,600 miles of our rivers are polluted from mining runoff. This bill would have ensured that in the future, mining companies are held financially responsible for water cleanup costs by requiring payment for cleanup in advance. It would have also eliminated the use of some of the most harmful water quality practices, protecting Colorado's rivers and our taxpayers.

Bill Sponsors: Representatives Barbara McLachlan and Dylan Roberts, Senators Stephen Fenberg and Kerry Donovan

House Vote: Passed 35-29 | **Senate:** Failed in State Affairs Committee

Pro-Environment Vote | YES

3 AMENDMENT J.161 | STATE BUDGET BILL FUNDING FOR LEAD IN SCHOOLS

This budget amendment would have provided additional funding for a public school lead testing grant program that was established in last year's legislative session. Lead can leach into drinking water from old pipes and fixtures and is especially damaging to children. Testing for lead is critical for safeguarding our children's health and protecting our drinking water. Of note, it is tradition that members of the Joint Budget Committee — including Senators Moreno, Lambert, and Lundberg — do not vote in favor of budget amendments regardless of their content.

Bill Sponsors: Senators Stephen Fenberg, Nancy Todd, Andy Kerr, Rhonda Fields, Kerry Donovan, and Irene Aguilar
Senate Vote: Failed 15-20

Pro-Environment Vote | YES

4 SENATE BILL 066 | EXTEND OPERATION OF STATE LOTTERY DIVISION

Colorado has one of the best funding programs in the West for protecting land, wildlife, and water. The proceeds from Colorado's lottery, which was approved by the voters, directly support outdoor recreation and land conservation, including a program called Great Outdoors Colorado (GOCO). Since its inception, GOCO has returned more than \$1.1 billion in lottery proceeds to the people of Colorado through projects in all 64 counties. This bill reauthorized the lottery until 2049, making sure these funds continue preserving and enhancing our state's wild spaces while inspiring youth to explore and take care of our great outdoors.

Bill Sponsors: Senators Jerry Sonnenberg and Leroy Garcia, Representatives Jeni Arndt and Cole Wist
House Vote: Passed 48-16 | **Senate Vote:** Passed 30-5
Signed by the Governor: April 30, 2018

Pro-Environment Vote | YES

INVESTING IN OUR GREAT OUTDOORS

A scenic landscape featuring a sunset over a mountain range with a lake in the foreground. The sky is filled with vibrant colors of orange, yellow, and purple, transitioning into a deep blue. The mountains are silhouetted against the bright light of the setting sun. In the foreground, a calm lake reflects the colors of the sky, surrounded by rocky terrain and patches of snow.

As our public lands are being threatened by the Trump administration, here in Colorado, our legislators made strides to protect them.

This year the state legislature passed two bills to help fund our public lands. One bill renewed a massive funding stream for Colorado's outdoors through Colorado's lottery. This bill (SB 066) dedicates funding for parks, open spaces, and outdoor recreation in all 64 counties of Colorado. Another bill (SB 143) protected the future of our state lands by allowing Colorado Parks and Wildlife to prevent budget shortfalls and meet its goals by adjusting user fees to keep pace with inflation.

Coloradans care deeply about our outdoor spaces, and our legislators know it. That's why they enacted two critical bills to help protect them for future generations.

OIL & GAS

As the oil and gas industry expands into our neighborhoods, we need safeguards in place to ensure we are putting people's health and safety ahead of profits. To do this, we fight for commonsense measures to keep people safe and hold the industry accountable when accidents happen.

Bill Descriptions

5 HOUSE BILL 1352 | OIL & GAS FACILITIES DISTANCE FROM SCHOOL PROPERTY

Oil and gas operations are currently required to be 1,000 feet away from high occupancy buildings, such as schools and hospitals. Unfortunately, this distance begins from the school building and not the school property line. This bill would have clarified that oil and gas facilities must be 1,000 feet away from a school's property boundary to protect playgrounds and sports fields, closing a loophole that puts children at risk.

Bill Sponsors: Representatives Mike Foote and Matt Gray, Senators Matt Jones and Irene Aguilar

House Vote: Passed 35-29 | **Senate:** Failed in State Affairs Committee

Pro-Environment Vote | YES

6 HOUSE BILL 1419 | OIL & GAS OPERATOR DISCLOSURES AND WELLHEAD INTEGRITY

In the spring of 2017, odorless gas leaking from an abandoned flow line led to a home explosion in Firestone, Colorado, where two people lost their lives. This bill sought to update state rules by requiring oil and gas companies to disclose the locations of the pipelines and flowlines they install, own, or operate to the state agency and affected local governments. Additionally, it would have prompted the state to develop rules around wellhead integrity to better protect against future accidents and explosions.

Bill Sponsors: Representatives Mike Foote and Dominique Jackson, Senators Matt Jones and John Kefalas

House Vote: Passed 35-29 | **Senate:** Failed in State Affairs Committee

Pro-Environment Vote | YES

7 HOUSE BILL 1157 | INCREASED REPORTING OF OIL & GAS INCIDENTS

In order to ensure the safety of our communities, we need thorough tracking and reporting of spills, fires, explosions, injuries, and deaths due to oil and gas activities. This bill would have improved reporting requirements, creating better oversight around accidents and instituting a structured reporting format.

Bill Sponsors: Representatives KC Becker and Jonathan Singer, Senator Stephen Fenberg

House Vote: Passed 34-29 | **Senate:** Failed in Agriculture, Natural Resources, and Energy Committee

Pro-Environment Vote | YES

8 SENATE BILL 192 | LOCAL GOVERNMENT LIABLE FOR FRACKING BAN OIL & GAS MORATORIUM

Local governments in Colorado have the ability to enact certain rules to regulate the oil and gas industry. This bill, however, would have made local governments financially liable to oil and gas operators for rules or regulations that curtailed oil and gas development in any way, thereby preventing the right of local governments to make decisions about oil and gas operations that affect their own communities.

Bill Sponsors: Senator Vicki Marble, Representative Perry Buck

Senate Vote: Passed 19-16 | **House:** Failed in State Affairs Committee

Pro-Environment Vote | NO

A STRANGLEHOLD ON COLORADO'S SENATE

This year conservation champions introduced several bills to make oil and gas operations safer:

- **HB 1071 would have changed the mission of Colorado's Oil and Gas Conservation Commission to put health, safety, and the environment over industry profits.**
- **HB 1157 would have increased the information that the industry tracks and reports, including all spills, fires, explosions, and injuries due to oil and gas operations.**
- **HB 1419 was a bill to require oil and gas pipeline mapping and wellhead integrity procedures in order for state officials to help ensure community safety.**
- **HB 1352 would have kept oil and gas drilling 1,000 feet away from school property boundaries instead of from school buildings, as the law currently states.**

The debate over these important bills brought out a lot of emotions from Coloradans who came to the Capitol to testify in favor of them. In one powerful moment, a young activist spoke out when a legislator asked if oil and gas explosions have happened near schools, asking, "Why does it need to happen first?"

All of these bills were killed by Senate Republicans who continue to pander to oil and gas companies, reminding us of how important it is to elect more pro-conservation champions.

CLIMATE & CLEAN ENERGY

As our clean air and climate protections are being threatened from the national level, it's up to states to take the lead. This year, Colorado legislators had several opportunities to protect public health, address climate change, and advance clean energy.

Bill Descriptions

9 HOUSE BILL 1274 | REDUCING STATEWIDE CARBON POLLUTION

This bill would have set a statewide goal to reduce carbon pollution across our economy by 80 percent by 2050 from 2005 levels, a goal that is in line with Governor Hickenlooper's climate commitments. This bill would have helped Colorado play our part in limiting climate change as well as drive innovation and investment in clean energy and new technology.

Bill Sponsors: Representatives KC Becker and Jeff Bridges, Senator Andy Kerr

House Vote: Passed 36-28 | **Senate:** Failed in State Affairs Committee

Pro-Environment Vote | YES

10 SENATE BILL 009 | ALLOW ELECTRIC UTILITY CUSTOMERS TO INSTALL ENERGY STORAGE EQUIPMENT

This bill makes Colorado one of the first states to declare energy storage a right for consumers. It allows Coloradans to install and use energy storage on their property without unnecessary restrictions—in turn, boosting the state's renewable market and jobs. Energy storage for consumers promotes grid resiliency and distributes resources like batteries across the energy system.

Bill Sponsors: Senators Stephen Fenberg and Kevin Priola, Representatives Faith Winter and Polly Lawrence

House Vote: Passed 45-18 | **Senate Vote:** Passed 30-5
Signed by the Governor: March 22, 2018

Pro-Environment Vote | YES

11 SENATE BILL 226 | PROHIBIT COLORADO INVOLVEMENT IN CLIMATE ALLIANCE

This bill would have prohibited Colorado from taking part in any state-level climate collaboration that attempts to reduce carbon dioxide emissions. This was a backwards measure to prevent Colorado from being involved in the U.S. Climate Alliance, which Governor Hickenlooper signed onto in 2017. The Climate Alliance is a set of voluntary goals that a group of states committed to when President Trump pulled out of the Paris Climate Agreement.

Bill Sponsors: Senators Kevin Lundberg and John Cooke, Representative Yeulin Willett

Senate Vote: Passed 18-17 | **House:** Failed in Transportation Committee

Pro-Environment Vote | NO

12 SENATE BILL 005 | RURAL ECONOMIC ADVANCEMENT OF COLORADO TOWNS

Four years in the making, the "REACT" bill supports rural communities impacted by economic downturn, like a big industry leaving. The bill provides much-needed coordination and resources for state agencies to assist rural communities. It does this by designating a specific state agency, the Department of Local Affairs, to coordinate economic assistance.

Bill Sponsors: Senators Kerry Donovan and Ray Scott, Representative Dylan Roberts

House Vote: Passed 36-22 | **Senate Vote:** Passed 22-13
Signed by the Governor: March 22, 2018

Pro-Environment Vote | YES

ENERGY STORAGE: THE NEW FRONTIER

This year we saw two important victories that will move clean energy forward in Colorado, and they were both related to energy storage! Storing energy in batteries for later use is vital technology to expand our use of clean energy.

Energy storage has bipartisan support at the state Capitol. The idea is that people, businesses, and utilities can utilize different storage methods to make sure our grid runs smoothly even when using intermittent energy sources like wind and solar. The bills that passed make energy storage a right for Coloradans (SB 009) and direct the Public Utilities Commission to consider energy storage in future planning (HB 1270). These new laws will boost renewable energy and move Colorado closer to our clean energy goals.

An added bonus of energy storage is that it allows Coloradans to take energy into our own hands. People can store energy from solar panels or wind turbines at their own homes, allowing them freedom over their own energy supply.

TRANSPORTATION

Colorado's growing population needs safe, fast, and convenient ways to get around. We are focused on making sure our transportation system is designed to move people, not just cars, in ways that meet all of our communities' needs and reduces air pollution.

Bill Descriptions

13 SENATE BILL 001 | TRANSPORTATION INFRASTRUCTURE FUNDING

As Colorado's population has boomed, funding for transportation has stagnated — leaving our transportation needs unmet for decades. A true compromise, this transportation funding bill includes flexible, statewide funding that invests in transit, bike, and pedestrian options as well as highways and roads. Because of the advocacy of conservation-minded Coloradans, SB 001 provides for all parts of the state in ways that effectively decrease congestion, create equity, and reduce air pollution. The scored Senate vote is the concurrence vote; the scored House vote is the third reading.

Bill Sponsors: Senators Randy Baumgardner and John Cooke, Representatives Perry Buck and Faith Winter
House Vote: Passed 36-29 | **Senate Vote:** Passed 35-0
Signed by the Governor: May 31, 2018

Pro-Environment Vote | YES

14 HOUSE BILL 1107 | PREWIRE RESIDENCE FOR ELECTRIC VEHICLE CHARGING PORT

Builders of new residences are already required to offer a “solar prewire” option to purchasers of newly constructed homes. This bill would have added a requirement for builders to offer homebuyers the option to install electric vehicle charging systems, both for houses and in condominium buildings, saving customers time and money.

Bill Sponsors: Representatives Mike Weissman and Senator Kevin Priola
House Vote: Passed 34-28 | **Senate:** Failed in Transportation Committee

Pro-Environment Vote | YES

15 SENATE BILL 047 | REPEAL TAX CREDITS INNOVATIVE VEHICLES

This bill was an attempt to repeal Colorado's tax credits for electric vehicles (EVs) — credits that have made our state one of the best in the country to purchase an EV. These credits have propelled Colorado into the top ten states for EV market share, helped consumers save money on fuel, and boosted our economy.

Bill Sponsors: Senator Vicki Marble, Representative Lori Saine
Senate Vote: Passed 18-16 | **House:** Failed in Transportation and Energy Committee

Pro-Environment Vote | NO

CHARGING UP ELECTRIC VEHICLES

Although the Trump administration is moving to weaken vehicle emissions standards, low emission and electric vehicles are still a growing part of Colorado's economy and future. Colorado is one of the best states in the country to buy an electric vehicle thanks to a tax credit the legislature passed a few years ago. Fortunately, an effort to undo that credit failed this year!

Despite support for electric vehicles from Coloradans across the state, a bill with strong bipartisan sponsorship didn't even make it out of its first Senate committee. This bill (SB 216) would have allowed utility companies to help build more charging stations, which are needed to make it easier to drive an electric vehicle without worrying about where to charge it.

Meanwhile, electric cars are gaining momentum in Colorado. Governor Hickenlooper committed to getting 1 million electric vehicles onto our roads by 2030, and this June, he opened the door to adopting clean car standards to reduce smog-forming pollutants from cars. In order to keep this trend moving to clean our air, protect public health, and save money for consumers, we need the state legislature to step up for clean cars.

A scenic view of a canyon with layered red rock formations and a river winding through the valley. The foreground shows a large, smooth rock formation with a small tree growing on it. The middle ground features a river flowing through a lush green valley. The background consists of high, layered red rock cliffs and a distant mountain range under a clear sky.

**“The land belongs to the future ...
We come and go, but the land is
always here. And the people who love
it and understand it are the people
who own it — for a little while.”**

— Willa Cather
